Speculation may not be undertaken in any of the processes.

5. DELEGATIONS

7.2. Debt Ethics

All officials involved in the debt management process must act with fidelity, honesty, integrity and in the best interest of the municipality and must strive, within the sphere of influence of the officials, to prevent any impairment of the debt of the municipality and other municipalities' good name and solvency problems.

No officials involved in the debt management process should use his or her position or privileges as, or confidential information obtained officials in the process for personal gain or unfair advantage to another person.

The Municipal Manager must report as soon as practicable to the Mayor as well as the National Treasury any alleged violation of the above and may also make recommendations whether the alleged offending party must be listed on the National Treasury's database of persons prohibited from doing any business with the public sector. Any such report by the Municipal Manager must complete details of the alleged violation and a written response from the alleged offending party, as proof that the alleged offending party did receive the allegations in writing and had at least 7 (seven) working days to respond to the allegations.

Any sponsor, offered or granted to the municipality must be immediately reported to the National Treasury.

7.3. Types of Debt

7.3.1. Short-term Debt

To ensure that the municipality has sufficient cash to meet the objectives of local government, as contained in Article 152 of the Constitution of the Republic of South Africa (Act 108 of 1996), it is sometimes necessary to obtain short-term financing in order to finance cash shortages in a financial year to cover the bridging operation and / or temporary capital financing.

Short-term debts may only be incurred if the Council is convinced that it will be refunded during the financial year and a report to the Council should indicate how and when it will be repaid, with specific reference to the conditions set in Article 45 of the Act on Local

**Bergvriev Municipality
Borrowing Policy**

Government: Municipal Finance Management Act (Act No. 56 of 2003).

No debt agreement for short-term debts may be incurred for a period that expires after the end of the financial year in which they are incurred. The Municipal Manager must, as part of the budgeting, determine in time whether the Council will need short term debt for the new financial year ahead and take such steps to ensure that the Council could consider a debt agreement before the date on which the Council will require such financing.

By considering the cash flow of the municipality it must be provided for emergency situations that additional cash may be needed and should be kept in mind to determine whether the Council should enter into short-term debts.

Nothing prevents the Municipal Manager to, if it appears that during the financial year a cash shortage arises, obtain approval from the Council for the introduction of short-term debts. However if it will not be repaid in the same financial year as a result of under-performance in terms of credit control or over expenditure, the Council will not be able to approve such agreement.

The conditions set out in Chapter 6 of the Act on Local Government: Municipal Finance Management, 2003 (Act No. 56 of 2003) must at all times be complied with by the Municipal Manager.

7.3.2. Long-term Debt - Capital Asset

The Council has an obligation to acquire assets and to maintain it in order to ensure service delivery, however it is not always possible for the Council to finance these assets from its own cash reserves. It is for this purpose that the Council may incur long-term debt.

No capital projects may be entered into before the financing sources have been considered, approved and are available. For the purposes of this, “available” means a legally enforceable document in the municipality's possession that

**Bergrivier Municipality

guarantees the funding. Short-term bridging finance for capital expenditure may be incurred in anticipation of the disbursement of the long-term debt, provided that the long-term financing is "available" and the conditions for engaging in short-term debts, as per par.7.3.1. above, are met.

The cost of long-term assets which may be incurred include the cost of securities, finance costs, advertising, legal, advisory, trustee, credit ratings and other costs of finance, professional services, where it directly applicable to the project and other amounts that the Minister of Finance may approve.

The terms of repayment of any debt must be calculated according to the expected useful life of the assets financed with the debt.

No long-term debt may be incurred if it is not compatible with the municipality's capital budget, excluded for refinancing.

7.3.3. Long-term Debt – Refinancing

The municipality is, in terms of Section 46 (5) of the Act on Local Government: Municipal Finance Management Act, 2003, allowed refinancing of long-term debt with the aim to save on the cost of debt. The Municipal Manager may, for this purpose, at least annually and as part of the budget process evaluate and report to the Council about the cost of existing debt, or if the refinancing is a benefit to the municipality. As part of the evaluation, the Municipal Manager should consider if a once-off payment at the end of the loan period would not be more favorable to the municipality if the repayments are invested in an investment fund with reasonable projected return on such investment.

Refinancing may only be for long-term debt which has been incurred lawfully in the past and with the further condition that the loan period does not exceed the expected lifespan of the assets financed thereby.

7.4. Security for Debt

It is common practice that investors or financiers required security for granting loans. The municipality will provide security for the inclusion of debt, as set out in section 48 of the Act on Local Government: Municipal

Finance Management Act, 2003, but the Council will consider each form of security, together with the debt agreement.

The maximum percentage of the operating budget for the repayment of debt must be calculated in the municipality's long-term budget with thorough consideration of the needs identified in the Integrated Development Plan, the cost of new or replacement of existing infrastructure and equipment and other administrative needs.

7.7. Competitive Bidding

The Municipal Manager should adhere to the process as per Supply Chain policy when considering the biddings received. For purposes of marking in terms of costs, the expected interest debt over the full term of the proposed debt agreement must be calculated and used as the basis for the 80/20 and 90/10 allocations.
